DataAnalyzer

High-performance data analysis of NetApp storage systems at your fingertips

DataAnalyzer gives you a complete overview of permission security and compliance in your organization. Easily see which folders and files are accessible to users and keep track of changes in user permissions over time. Optimize your storage with Hot/Cold analysis, size reports for cost allocations and much more.

Key functionalities

- Meet **compliance requirements** with detailed reports.

- **Reduce risk** with permission security and governance.

- Prevent insider threats with **access and permission reporting**.

- **Improve** quality of **business data**, while also uncovering silos or access issues.

DataAnalyzer

High-performance data analysis of NetApp storage systems

ProLion

DATAANALYZER
